

You could be an EH&S Technologist

*Growing what matters
starts with you.*

JOB DESCRIPTION

The Environmental Health & Safety Technologist works closely with plant personnel and other members of the EH&S Delivery team to ensure excellent EH&S performance and full compliance with standards and requirements.

RESPONSIBILITIES

- Participate and lead efforts in plants/labs/etc. to increase Environmental Health & Safety (EH&S) performance
- Update, maintain and rollout new EH&S standards, tools and work processes
- Establish, track and drive improvement in key EH&S performance metrics (training, corrective actions, housekeeping, compliance task completion etc.)
- Conduct internal plant audits and assessments (e.g. safety, housekeeping, and compliance).
- Participate in root cause investigations for injuries, illnesses, and spills.

EDUCATION/TRAINING

- Associates degree in Environmental Science or Industrial Safety or minimum of five (5) years relevant work experience working in a manufacturing facility
- B.S. degree in a science related discipline is preferred

CAREER PROGRESSION

- EH&S Specialist
- EH&S Delivery Leader
- EH&S Center of Expertise

SKILLS FOR SUCCESS

- Strong written and verbal communication
- Good computer skills
- Ability to inspire others, intervene, and lead change.
